

## 92-B-57(25) - SPEEDLINE METAL STUD PARTITION

--

| Version V1(24/10/23)         |                                                                                                                                                          |
|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| SPEEDLINE Reference:         | 92-B-57(25)                                                                                                                                              |
|                              |                                                                                                                                                          |
| Performance Overview:        |                                                                                                                                                          |
| Fire Resistance (minutes):   | 60/60 (Integrity/Insulation) BS 476 Part 22: 1987                                                                                                        |
| Sound Insulation:            | 50 R <sub>w</sub> dB estimated on 70-B-57(25)                                                                                                            |
| Maximum Height:              | Calculated on limiting deflection L/240 at 200Pa                                                                                                         |
| @ 600 mm Ctrs:               | 5200 mm                                                                                                                                                  |
| @ 400 mm Ctrs:               | 5800 mm                                                                                                                                                  |
| @ 300 mm Ctrs:               | 5900 mm                                                                                                                                                  |
| Nominal Width:               | 142 mm. (Excluding finishes).                                                                                                                            |
| Insulation Required:         | 25 mm APR.                                                                                                                                               |
| Duty Rating:                 | Severe. BS 5234-2:1992 (Annexes A-F)                                                                                                                     |
| Deflection Required:         | To be confirmed by Structural Engineer.                                                                                                                  |
| Steel Framing Detail:        | All as par the surrent SPEEDINE Drawall Manual                                                                                                           |
| Head Tracks:                 | All as per the current <b>SPEEDLINE</b> Drywall Manual.<br><b>SPEEDLINE SPT94 'U' Track</b> , secured to soffit with two rows of suitable fixings at 600 |
| Tiedd Tracks:                | mm centres, staggered by 300 mm to each side of track. (Utilise SPEEDLINE Deep                                                                           |
|                              | Flange 'U' Track if deflection allowance is required).                                                                                                   |
| Base Tracks:                 | SPEEDLINE SPT94 'U' Track, secured to floor with two rows of suitable fixings at 600                                                                     |
| base fracks.                 | mm centres, staggered by 300 mm to each side of track.                                                                                                   |
| Studs:                       | SPEEDLINE SPS92 'C' Studs at 600 mm centres. Friction fitted into tracks.                                                                                |
|                              | (400 mm centres if to be tiled). Abutment 'C' studs secured with two rows of suitable                                                                    |
|                              | fixings at 600 mm centres, staggered by 300 mm in each side of stud.                                                                                     |
| Deflection Head:             | If structural deflection is deemed necessary, please refer to SPEEDLINE Drywall                                                                          |
|                              | Manual and/or project detail.                                                                                                                            |
| <u>Plasterboard linings:</u> |                                                                                                                                                          |
| Inner Layer:                 | 12.5 mm British Gypsum Gyproc WallBoard attached to both sides of framing at                                                                             |
|                              | 600 mm maximum centres with <b>25 mm SPEEDLINE Drywall Screws</b> .                                                                                      |
| Outer Layer:                 | 12.5 mm British Gypsum Gyproc WallBoard attached to both sides of framing at                                                                             |
|                              | 300 mm maximum centres with <b>38 mm SPEEDLINE Drywall Screws</b> .                                                                                      |
| Humid Areas:                 | Replace with 12.5 mm British Gypsum Gyproc Moisture Resistant attached to framing                                                                        |
| Boarding Installation:       | at 300 mm maximum centres with <b>38 mm SPEEDLINE Drywall Screws</b> .                                                                                   |
| Horizontal Board Joints:     | All plasterboard joints to be staggered on opposing partition faces.                                                                                     |
| Horizonial Board Joinis:     | SPEEDLINE PB24 Partition Brace or FS24 Flat Bracing Strip required behind all horizontal board joints.                                                   |
| <u>Finishes:</u>             | Skim plaster or taped & jointed (MR Boards to be taped & jointed only).                                                                                  |
| Acoustic Seal:               | At junctions between partitions and any other air paths, apply a continuous bead of                                                                      |
|                              | SPEEDLINE Intumescent Sealant, to clean dust free surfaces. Please Note: SPEEDLINE                                                                       |
|                              | Intumescent Sealant is NOT compatible with Lubrizol cPVC pipes.                                                                                          |
| Accessories:                 | Service Support Plate AH174 & 18 mm Plywood for all pattresses.                                                                                          |
|                              | Electrical socket openings should be considered as part of the fire stopping package                                                                     |
|                              | and consideration should be given to meet the performances of the Partition/Lining                                                                       |
|                              | system regarding fire and acoustic performance.                                                                                                          |
|                              |                                                                                                                                                          |

SPEEDLINE Drywall Systems, Adsetts House, 16 Europa View, Sheffield Business Park, Sheffield, S9 1XH.

Tel: 0114 231 8030. Email: <u>enquiries@speedlinedrywall.co.uk</u>

Type & Ref:

(As per the requirements set out in ISO/IEC 17025:2017 regarding test data the results stated have been carried out by voestalpine Metsec plc as part of the contract to supply Speedline Metal Sections to SIG Plc)

**General Notes:** 

To be installed in accordance with SPEEDLINE recommendations and relevant British standards including BS 8000-0:2014 and BS 8000-8:2023. This document should be read in conjunction with clauses specified in original contract documentation. Flanking details to be appropriate to current requirements.
