

SE70-K-56 - SPEEDLINE SHAFT ENCASEMENT

Type & Ref: Version V1(24/10/23)	
SPEEDLINE Reference:	SE70-K-56
Performance Overview:	
Fire Resistance (minutes):	60/60 (Integrity/Insulation) BS 476 Part 22: 1987 from Shaft side only
Sound Insulation:	40 R _w dB estimated
Maximum Height: Nominal Width:	4400 mm (Calculated on limiting deflection L/240 at 200Pa) 87 mm. (Excluding finishes).
Insulation Required:	NA.
Duty Rating:	Heavy. BS 5234-2:1992 (Annexes A-F)
Deflection Required:	To be confirmed by Structural Engineer.
Steel Framing Detail:	
Head Tracks:	SPEEDLINE SPEDT72 secured to ceiling in the centre of the profile at 600 mm centres with suitable fixings.
Base Tracks:	SPEEDLINE SPT72 secured to the floor in the centre of the profile at 600 mm centres
Studs:	with suitable fixings. Install row of SPEEDLINE PI70 (70 mm) 'I' stud friction fitted into tracks at 600 mm
31005:	centres.
Vertical Abutments:	Install SPEEDLINE SPEDT72 Deep Flange 'U' Track , secured at max 600 mm centres,
Deflection Head:	with suitable fixings. If structural deflection is deemed necessary, please refer to SPEEDLINE Drywall
	Manual and/or project detail.
Plasterboard linings:	
Shaft Side:	Single layer of Knauf 19 mm Coreboard installed between the studs secured with AH180 Shaft Encasement Brackets, at 600 mm maximum centres. First & last clip
	150 mm Max from tracks. Coreboard should be cut short by deflection allowance.
	Head packer to suit deflection, should be installed between studs and screw fixed to
	head track with min three fixings ensuring a minimum 4 mm overlap of internal
	head packer & core board lining. Refer to SPEEDLINE Drywall Manual or project
	details.
	Horizontal joints in Coreboard layer should be covered with a 100 mm wide strip of
Outor Lavor	Horizontal joints in Coreboard layer should be covered with a 100 mm wide strip of core board, screw fixed & sealed with SPEEDLINE Intumescent Sealant .
Outer Layer:	Horizontal joints in Coreboard layer should be covered with a 100 mm wide strip of core board, screw fixed & sealed with SPEEDLINE Intumescent Sealant . 15 mm Knauf Fire Panel attached to framing at 300 mm maximum centres with
Outer Layer: Humid Areas:	Horizontal joints in Coreboard layer should be covered with a 100 mm wide strip of core board, screw fixed & sealed with SPEEDLINE Intumescent Sealant . 15 mm Knauf Fire Panel attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws . Replace with 15 mm Knauf Performance Plus attached to framing at 300 mm
Humid Areas:	 Horizontal joints in Coreboard layer should be covered with a 100 mm wide strip of core board, screw fixed & sealed with SPEEDLINE Intumescent Sealant. 15 mm Knauf Fire Panel attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws. Replace with 15 mm Knauf Performance Plus attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws.
	 Horizontal joints in Coreboard layer should be covered with a 100 mm wide strip of core board, screw fixed & sealed with SPEEDLINE Intumescent Sealant. 15 mm Knauf Fire Panel attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws. Replace with 15 mm Knauf Performance Plus attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws. SPEEDLINE PB24 Partition Brace or FS24 Flat Bracing Strip required behind all
Humid Areas: Horizontal Board Joints: <u>Finishes:</u>	 Horizontal joints in Coreboard layer should be covered with a 100 mm wide strip of core board, screw fixed & sealed with SPEEDLINE Intumescent Sealant. 15 mm Knauf Fire Panel attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws. Replace with 15 mm Knauf Performance Plus attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws.
Humid Areas: Horizontal Board Joints:	 Horizontal joints in Coreboard layer should be covered with a 100 mm wide strip of core board, screw fixed & sealed with SPEEDLINE Intumescent Sealant. 15 mm Knauf Fire Panel attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws. Replace with 15 mm Knauf Performance Plus attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws. SPEEDLINE PB24 Partition Brace or FS24 Flat Bracing Strip required behind all horizontal board joints. Skim plaster or taped & jointed (MR Boards to be taped & jointed only). At junctions between partitions and any other air paths, apply a continuous bead of
Humid Areas: Horizontal Board Joints: <u>Finishes:</u>	 Horizontal joints in Coreboard layer should be covered with a 100 mm wide strip of core board, screw fixed & sealed with SPEEDLINE Intumescent Sealant. 15 mm Knauf Fire Panel attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws. Replace with 15 mm Knauf Performance Plus attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws. SPEEDLINE PB24 Partition Brace or FS24 Flat Bracing Strip required behind all horizontal board joints. Skim plaster or taped & jointed (MR Boards to be taped & jointed only). At junctions between partitions and any other air paths, apply a continuous bead of SPEEDLINE Intumescent Sealant, to clean dust free surfaces. Please Note: SPEEDLINE
Humid Areas: Horizontal Board Joints: <u>Finishes:</u>	 Horizontal joints in Coreboard layer should be covered with a 100 mm wide strip of core board, screw fixed & sealed with SPEEDLINE Intumescent Sealant. 15 mm Knauf Fire Panel attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws. Replace with 15 mm Knauf Performance Plus attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws. SPEEDLINE PB24 Partition Brace or FS24 Flat Bracing Strip required behind all horizontal board joints. Skim plaster or taped & jointed (MR Boards to be taped & jointed only). At junctions between partitions and any other air paths, apply a continuous bead of SPEEDLINE Intumescent Sealant, to clean dust free surfaces. Please Note: SPEEDLINE Intumescent Sealant is NOT compatible with Lubrizol cPVC pipes. Service Support Plate AH174 & 18 mm Plywood for all pattresses.
Humid Areas: Horizontal Board Joints: <u>Finishes:</u> Acoustic Seal:	 Horizontal joints in Coreboard layer should be covered with a 100 mm wide strip of core board, screw fixed & sealed with SPEEDLINE Intumescent Sealant. 15 mm Knauf Fire Panel attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws. Replace with 15 mm Knauf Performance Plus attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws. SPEEDLINE PB24 Partition Brace or FS24 Flat Bracing Strip required behind all horizontal board joints. Skim plaster or taped & jointed (MR Boards to be taped & jointed only). At junctions between partitions and any other air paths, apply a continuous bead of SPEEDLINE Intumescent Sealant, to clean dust free surfaces. Please Note: SPEEDLINE Intumescent Sealant is NOT compatible with Lubrizol cPVC pipes. Service Support Plate AH174 & 18 mm Plywood for all pattresses. Electrical socket openings should be considered as part of the fire stopping package
Humid Areas: Horizontal Board Joints: <u>Finishes:</u> Acoustic Seal:	 Horizontal joints in Coreboard layer should be covered with a 100 mm wide strip of core board, screw fixed & sealed with SPEEDLINE Intumescent Sealant. 15 mm Knauf Fire Panel attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws. Replace with 15 mm Knauf Performance Plus attached to framing at 300 mm maximum centres with 25 mm SPEEDLINE Drywall Screws.
